HEXA

A modern classroom interior featuring a grid of white, three-dimensional ceiling panels. Rows of light-colored wooden desks are paired with bright orange ergonomic chairs on casters. In the background, a large whiteboard is covered in handwritten mathematical equations and diagrams. A laptop is open on one of the desks, and a red desk lamp is visible. The overall atmosphere is clean, bright, and contemporary.

LABORATORY PRODUCTS

WE ALL KNOW THAT THE SAFETY OF STUDENTS IS OF THE FIRST PRIORITY. THEREFORE WE EQUIP YOUR LABORATORIES WITH THE LATEST TECHNOLOGY SYSTEMS.

COLLEGE REC

Table Top (Chemical Compact)

According to EN 438 standards the table is "Chemical Compact Laminated".

The table steel hitch connection. With the help of peg and bolt it is easy to demount and the spaces between two points is maximum 60cm.

The table steel hitch connection; a hole on compact's surface has been made by drill and with the help of screw it can be demounted also the space between two points is 60cm.

Carrier System

Horizontal and vertical carrier are demountable. Oscillation is at maximum level.

Gas Fitting

Gas fitting is according to international standards DIN12898, EN13792:2000, ISO228/1 ve DIN12918

Water Fitting

The water and gas fittings on the table are according to the international standards of DIN12898, EN13792:2000, ISO228/1 ve DIN12918

Electric Sockets

It is compatible to 220V 16A and also below mentioned standards.

Electric Sockets, Compatible with "TVDIN VDE 0620-1(VDE 0620-1):2005-04"

Electric Sockets, compatible with "DIN49440 VE IEC 60884-1"

Electric sockets are manufactured with thermoplastic raw materials.

ELECTRON

Table Top (chemical Compact)

Compact laminated materials

Carrier System

Horizontal and vertical carrier are demountable. Oscillation is at maximum level.

Electric Sockets

It is compatible to 220V 16A and also below mentioned standards.

Electric Sockets, Compatible with "TVDIN VDE 0620-1(VDE 0620-1):2005-04"

Electric Sockets, compatible with "DIN49440 VE IEC 60884-1"

Electric sockets are manufactured with thermoplastic raw materials.

ELECTRON & LARGE

Power source

There are two power resource AC and DC on the device shown by digital indicator. Every sign AC and DC shows the power flow as A-V button as ampere and volt. Every indicator can work as ampere meter and voltmeter. It can be chosen as A/V button mode by the touch button next to indicator, the selected mode is shown as A and V with the LED lights near indicator.

The short circuit and overcurrent imported by AC or DC is shown on warning LED light.

DC output; between 0-24 V DC voltages, between 0-3A current.

Output is very sensitive and can be controlled by up/down button.

On DC panel once the voltage mode has been selected, it appears on voltage digital screen.

There is one button for output current/flow DC power resource adjusts the current from 0-3 ampere.

If the current is overloaded the system cuts the connection and gives warning through the overcurrent LED. If overcurrent has been led out of the power resource for longer time, device cuts the output voltage automatically to get it back to normal the up/down buttons should be used.

DC power resource has protection property against short circuit or overcurrent.

AC output; can provide from 0-24v DC voltage and 0.3A current.

After selecting voltage mode from AC panel, it will be appeared on digital screen.

After voltage adjustments to protect output from voltage fluctuation it delay 1 to 2 seconds.

Symmetric DC output; power resource between +12V and -12V has symmetrical power output.

ELECTRON & WATER

Table Top (Chemical Compact)

According to EN 438 standards the table is "Chemical Compact Laminated".

The table steel hitch connection. With the help of peg and bolt it is easy to demount and the spaces between two points is maximum 60cm.

The table steel hitch connection; a hole on compact's surface has been made by driller and with the help of screw it can be demounted also the space between two points is 60cm.

Carrier System

Horizontal and vertical carrier are demountable. Oscillation is at maximum level.

Sink and Water System

Ceramic sink with dimension of 53x46.

Gas Fitting

Gas fitting is according to international standards DIN12898, EN13792:2000, ISO228/1 ve DIN12918

Water Fitting

The water and gas fittings on the table are according to the international standards of DIN12898, EN13792:2000, ISO228/1 ve DIN12918

Electric Sockets

It is compatible to 220V 16A and also below mentioned standards.

Electric Sockets, Compatible with "TVDIN VDE 0620-1(VDE 0620-1):2005-04"

Electric Sockets, compatible with "DIN49440 VE IEC 60884-1"

Electric sockets are manufactured with thermoplastic raw materials.

COLLEGA CLASS

Table Top (Chemical Compact)

According to EN 438 standards the table is "Chemical Compact Laminated".

The table steel hitch connection. With the help of peg and bolt it is easy to demount and the spaces between two points is maximum 60cm.

The table steel hitch connection; a hole on compact's surface has been made by driller and with the help of screw it can be demounted also the space between two points is 60cm.

Carrier System,

Horizontal and vertical carrier are demountable. Oscillation is at maximum level.

RADON

Working Surface;

Chemical laminated compact: it is chemical resistant laminated compact based on EN438 standards.

Accessories:

The mountable equipment column, water fittings are according to international standards DIN12898. EN13792:2000, 180228/1 and DIN12918

The mountable equipment column, gas fittings are according to international standards DIN12898, EN13792:2000. 180228/1 ve DIN12918

Electric Sockets; are 220V 16A and compatible with the below standards

Electric sockets: compatible with "TVDIN VDE 0620-1(VDE 0620-1):2005-04" Standards

Electric sockets: compatible with "DIN49440 VE IEC 60884-1" Standards

Electronic Sockets: can be mounted as shown in plan over installment tap, in four groups. Electric Sockets are thermoplastic.

Shelves

The horizontal shelves in Tesisat are 2mm (± 0.5 mm) galvanized steel material.

Horizontal shelves will have 150cm length and 5cm thickness and will be between two TESISAT Column.

The connection of horizontal shelf with column is not visible and demounted, also there are holes for cables. Under the horizontal shelves there are space for LED light. The shelf below is 3cm over table.

Cabinet system mm E MDF laminated the doors of the cabinets are

The cabinet are made of 2mm and the edges are made of 0.40mm PVC. The cabinets are manufactured in modular way and it can be demounted without use of any electronic equipment. Also it can have wheels. Cabinet doors have chrome covered horizontal handles.

ECOLOGY

Industrial Ceramic:

Unlimited chemical resistance made of industrial techno ceramic. 26mm length and width. The sink 295x145x165 made of ceramic is available in working surface area. The device is resistance in any heat or concentration towards acid (except hydrographic acid), alkali, salt, and organic solutions.

2 Chemical laminated compact: it is chemical resistant laminated compact based on EN438 standards.

Accessories:

The mountable equipment column, water fittings are according to international standards DIN12898. EN13792:2000, 180228/1 and DIN12918

The mountable equipment column, gas fittings are according to international standards DIN12898, EN13792:2000. 180228/1 and DIN1'2918

Electric Sockets; are 220V 16A and compatible with the below standards

Electric sockets: compatible with (TVDIN VDE 0620-1(VDE 0620-1):2005-04) Standards

Electric sockets: compatible with (DIN49440 VE IEC 60884-1) Standards

Electronic Sockets: can be mounted as shown in plan over installment tap, in four groups. Electric Sockets are thermoplastic.

Air Emitting System

You can control the Air Emitting system on electric panels of device. The capacity of air flow minimum 300 m³/h; and maximum 900 m³/h and every aperture has a 0.50m/s capacity too. The fume fan is made of polypropylene and snail roof type. The fan motors are 3 phase 380V, 50Hz, IP55 and should be installed out of the building. Fan motor strength should be chosen based on flow and pressure loss. The average pressure loss of the fume hood is 1350m³/h.
